

## ARTIST DRY\_200 / \_300 / \_400/ \_500

**Dry painting booth with double filtration stage.**

**The perfect mix between performance, quality and price.**

The painting booth is built in modular sandwich panels (thickness 40 mm), pre-painted on both sides white/grey color with details on galvanized sheet metal bended.

- Made in ISO-WALL PANELS thickness 40mm, while superior and internal parts are made in zinc-coated sheet iron thickness 15/10.

## 1<sup>st</sup> Filtering phase :

- High efficiency filter type ANDREAE : it makes the front part of the booth studied by leader companies in the filtering field. It is in multilayer paper with high efficiency and capacity of collection.
- Filtering surface is sized in order to obtain a perfect filtration and a good duration of filters.
- Collection capacity
 

9,8 Kg/m <sup>2</sup> varnishes in solvent
7,26 Kg/m <sup>2</sup> water soluble varnishes
0,54 Kg/m <sup>2</sup> cellulose nitrate varnishes
- Losses of cargo : 125 Pa

## 2<sup>nd</sup> Filtering phase :

- Medium efficiency filter type GLASS : this second barrier permits a further drying absorption of the varnishes' overspray.
- Material is made by long glass fibres linked by air- hardening resin placed to realize a progressively denser in direction of air's flow.
- Collection capacity : 3.000 | 5.000 gr/m<sup>2</sup>
- Losses of cargo : 250 Pa

## SALVAMAC IN SHORT: THE POWER OF CHANGE

Salvamac is a modern company, born from a large baggage of experience and guided by a vision oriented to the future and always open to change.

**Salvamac Group** is the result of over **20 years** of experience of the founding partners, Christian Salvador and Ziemowit Dolkowski, who continue to invest their strong passion and their deep knowledge for the sector of woodworking machinery.

The predisposition to trust others, the desire to get involved and the encounter of original ideas guide our work every day. Salvamac grows and evolves continuously to build a complete and interconnected network of professionals.

Salvamac continues to move forward in its social and ethical approach to production, innovation by creating a true and relevant group that is based on the support of **4 production units in different countries** to obtain a winning mix of Italian heads and heart with dynamics, advantages and the competences of national realities in strong evolution

In this perspective, the Salvamac Group multiplies itself exponentially in **3 departments**. The **Cross-cutting** part specialized in the cutting and optimization of wood, the **Air&Painting** department where the suction, air filtration, the wood painting systems find the reference point and finally the brand new Salvamac **Selection**, a real innovation that is the great natural evolution of the Salvamac project.

**Salvamac: made by people for people!**
